Composition and Interpretation for Maverick Artists

Art is all about figuring out what you want to say, and how to say it. Interpreting what you experience and composing it as a two dimensional image is key to creating authentic work. In this fun, interactive painting workshop we learn and work out how to develop paintings with good compositional “bones” that come from YOUR interpretation. We explore compositional “rules” like the rule of thirds, and the rule of dominance – and then we discuss and experiment how to break them.

The Value of the Values, and Why That Changes Everything

The term “value” in a painting or drawing refers to the relative darkness and lightness. Frankly, if the value isn’t good the whole piece isn’t good, no matter how well it’s drawn or composed. This is why the value of value is essential...invaluable you might say (sorry, couldn’t resist)

Color Theory for Creative Revelry
